Re: Docket #07-16

Dear Secretary Dortch,

Small businesses are the driving force behind the country's economy and the Internet is a major part of the daily American routine. With the Internet, small businesses are able to reach more people and expand their business. As a partner of a small business, I know that it is important for small businesses and consumers to have Internet access.

I support the plan by M2Z Networks to provide free, fast wireless broadband Internet access to everyone. With Internet access, small businesses will be able to use the Internet in the most efficient way and will be able to access information easier and stay connected to the latest news and information in their market. The Internet will also open up more resources and opportunities for every American small business.

I hope you will approve the plan to provide fast, free, wireless broadband Internet access. The economy will prosper even more as more small businesses are connected and competing in the global economy.

Thank you for your time and for all that you do.

Sincerely,

Elaine Shanley, MBA
Partner

Re: Docket #07-16

Dear Secretary Dortch,

Today, just 35 percent of all small and independent businesses have a website. I'm writing today to ask for your approval of a proposal by M2Z Networks that will work to change that fact. Adding more businesses to the online community will greatly impact those individual businesses and the communities they support. When consumers are searching for a new product or service, the web has turned into the source which provides the most information in the most efficient way.

With free broadband access, businesses can use the internet, participate in and benefit from e-commerce, and expand their consumer base while saving money. With free broadband and optional services proposed by M2Z Networks, getting a business online will be cost-efficient. Once online, small businesses will see increased marketing and consumer exposure which will expand the sales of that business and increased sales will positively affect the business, its employees, its community and the American economy.

As the President of my small business, I know that this opportunity is needed and would be well-received. Approving this proposal would open new avenues of marketing and sales for small businesses everywhere, and I ask for your support. Thank you for your time.

Sincerely,

James R. Jones

Re: Docket #07-16

Dear Secretary Dortch,

I'm writing in support of Docket #07-16, and I ask you to provide M2Z Networks with the national spectrum license it needs to create a free, fast and family-friendly wireless broadband network. If more Americans are able to easily access fast and reliable internet service, then I believe they will be able to shop online and find new businesses and services for their use.

As the long time General Manager and now Commercial Sales Manager of Sharrett, Inc., I know that small businesses will positively benefit from this tremendous opportunity, if allowed. Nationally, online sales account for billions of dollars each quarter, and if more people have free and reliable access to the Internet, I believe those sales will increase, to the benefit of small businesses that can utilize the Internet.

I urge you to support Docket #07-16 and bring free, fast wireless broadband Internet access to millions of Americans and businesses that otherwise cannot afford these services. The sales made online have a positive impact on the economy and increasing online access will improve the already sizable results. Thank you for your consideration and time.

Sincerely,

Joe Yungwirth
Commercial Sales Manager
